LIGHTING JOB COMPLETION

Congratulations on the completion of your new Lutron RadioRA 2 lighting system! We are sure that it will provide you with enjoyment and convenience for years to come.

Your Lutron RadioRA 2 system comes with a limited manufactures warranty for a period of one year (please refer to the manufacture warranty paper for exact details). There are a few details in your warranty that must be adhered to in order to not void your warranty:

- Each dimmer and hybrid keypad dimmers have a maximum load wattage rating (can be found on the *Device Installation Report*). That load rating shall not be exceeded. The load rating refers to the total wattage of all bulbs controlled by that dimmer (or the top button of the hybrid keypads). Switches are similar in that they have a maximum current rating. This load rating DOES NOT supersede lighting fixture ratings if their total ratings are lower than the dimmer maximum.
- Compact Florescent Lamps (CFL bulbs) and LED bulbs can be dimmed, but require the use of specific dimmable bulbs AND a compatible dimmer. Lutron currently has not approved any CFL or LED standard bulb types for use with the RadioRA 2 dimmers. These bulb types should not be used with your dimmers. Halogen and Incandescent bulbs are acceptable (unless the dimmer is a CFL or LED dimmer).
- All bulb types are safe to use with RadioRA 2 switches as long as the load rating is not exceeded.

Attached with this job completion form, you should have your *Device Installation Report* and your *Invoice*. You should also have had the *Device Installation Report* explained to you, along with the maximum load ratings, and a system use walkthrough.

By signing this form, you are confirming that you understand the above stated warranty information, have received and had explained your *Device Installation Report*, and have received a system use walkthrough. Renfrey Home Automation shall not be held responsible for any malfunction or incident resulting from not adhering to the above information or any other information contained within the manufacture warranty.
